Liberating people
potential

Atos

Meeting your AI challenge

Artificial Intelligence (AI) is evolving at an incredible rate, with astonishing progress in Generative AI (GenAI) specifically being made all the time. It's already starting to revolutionize work, helping businesses to thrive and inspiring people to fulfil their true potential. Those who don't invest in AI now run the risk of falling behind and missing out on its amazing capabilities.

Microsoft Copilot for Microsoft 365 (M365) is a prime example of the possibilities that GenAI creates. As a member of the Copilot Early Adopter program, Atos is already seeing exciting results across multiple business domains.

Yet while the benefits of Copilot are clear, so too are the challenges for any business wishing to accelerate AI-enabled transformation. Expert preparation is key, as is a sharp focus on robust governance and targeted returns on investment.

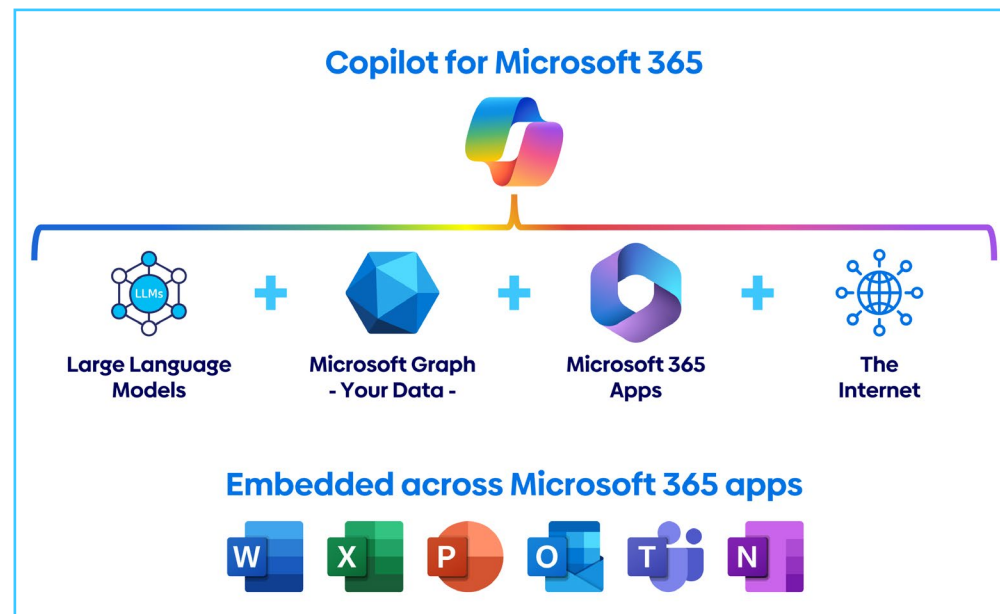

Here's where Atos can help. As an AI pioneer and trusted digital partner, we're here to support a fast-paced journey to make sure you get the best from Copilot now and in the future.

Why invest in Copilot for Microsoft 365?

Copilot for Microsoft 365 is a sophisticated enterprise Generative AI tool that brings boundless opportunities. It's a powerful way to get more from Microsoft 365 applications, from automating everyday Microsoft Office tasks, to generating creative content and reimagining whole Line of Business processes.

For your business, Copilot is a fast way to enhance employee experience, increase performance and address resourcing challenges. For your people, it eliminates time and effort, freeing them to upskill and to use their creativity and imagination.

At Atos, we're leveraging Copilot in our own business and enabling our customers to do the same. The outcomes we're seeing are impressive, and the journey continues.

Global Leadership in Digital Transformation

Draw on our global leadership in digital workplace services, integrating Copilot seamlessly into your environment for superior business results.

Embedding Copilot for Microsoft 365 in your organisation

Navigating your Copilot journey together

Our expert team is here to inform and guide your Copilot journey, from discovery, through deployment, and onto proactive value generation.

Kick-off and discovery

Joint Copilot workshop with our experts to identify:

- Key personas, scenarios and processes that would benefit most from transformation with Copilot
- Next steps to prepare for Copilot, including:
 - Required datasets and governance
 - Migration approaches for non-cloud data

Getting you ready for Copilot

- Identifying high-value scenarios and personas
- Specifying your licensing requirements
- Identifying data readiness: permissions and security compliance
- Prompting mechanisms and workflows

Deploying Copilot

- Deploy Copilot licenses to users
- Implementing data readiness, permissions and security compliance
- Enable templates for agreed Copilot personas
- Configure settings to enable Copilot for selected users

Driving adoption

- User readiness assessment
- Change management and champions program
- End-user learning and communications
- Your own Copilot Center of Excellence

Copilot extensibility

- Copilot plugins and connectors
- Connect data to Microsoft Graph and Dataverse
- Use cases beyond out-of-the-box features
- Integration, customization and configuration services

Ongoing support

- Proactive user support
- Reporting on Copilot usage and trends
- User and policy management
- Governance for ongoing dataset changes and content management

Empower Your Success with Copilot

Our Digital Workplace Consulting Engagement Framework is designed to streamline your transition to Copilot. By analyzing your business and user data, we create a comprehensive map that uncovers key relationships and insights. This enables Copilot to provide precise, actionable responses that adhere to the highest standards of security, compliance, and privacy.

Choose Atos for a Future-Ready Workplace
